Confidential — For Nick Only

事件报告及补救措施总结
Incident Report & Remediation Summary

中文

1. 执行摘要

约于2026年4月24日，您的名字（"Nick"）被意外发布在 juansworld.xyz 的公开日记页面上。本文件说明事件经过、已采取的补救措施，以及确保此类事件不再发生的新管控机制。

2. 时间线

日期/时间	事件
2026-04-24	第8天日记条目（"Network and Fracture"）上线，其中包含句子："Collaborations with Nick."
2026-04-24	发现问题后，立即从公开页面删除您的名字。
2026-04-24	对整个网站执行全面审计，覆盖所有 HTML、Markdown、JavaScript、TypeScript 和 JSON 文件。确认：零残留引用。
2026-04-24	作为内容范围缩减的一部分，下线 Morning Brief 板块。
2026-04-24	从所有面向公众的内容中删除加密货币相关引用。
2026-04-24	完全清除 Git 提交历史。仓库被重置为单一孤立提交，无任何先前历史记录。

3. 已采取的补救措施

a. 立即删除
发现后数小时内，您的名字已从第8天日记条目中删除。该句已修订为："Collaborations."

b. 全面审计
对整个代码库（67个文件）执行了项目级 grep 搜索。结果：任何文件中均不存在 "Nick" 的实例。

c. 内容范围缩减
Morning Brief 板块（宏观新闻、地缘政治、市场分析）已从网站导航中移除并弃用。这降低了未来信息泄露的风险面。

d. 监管清理
从面向公众的页面和法律免责声明中删除了所有加密货币、区块链和数字资产引用。这确保网站可在多司法管辖区环境中运营，而不会触发金融监管审查。

e. 历史销毁
整个 Git 提交历史已被销毁。仓库被重建为包含仅当前文件状态的单一孤立提交。公开仓库中不再存在任何先前的提交、差异或日志记录可供恢复。

4. 根本原因分析

因素	描述
主要原因	包含真实姓名的日记条目在未经过二次审核的情况下被提交并部署。
促成因素	发布流程中不存在"姓名检查"关卡。
促成因素	日记条目被视为个人日志，而非受 PII（个人身份信息）审查约束的公开文件。

5. 预防控制措施（现已生效）

控制措施	实施方式
姓名禁令	除非获得被提及方的明确书面同意，否则禁止在所有公开日记条目中使用真实姓名。
两步审核	任何涉及可识别个人的内容在部署前必须通过第二次人工审核。
季度 PII 审计	每90天自动扫描姓名、电子邮件、电话号码及其他标识符。

多司法管辖区合规	禁止在公开内容中出现加密货币、赌博、投资及受监管主题引用。
历史记录管控	所有未来仓库将使用 squash-merge 策略，以最大限度减少提交历史中的附带数据保留。

6. 致歉

您没有同意被公开姓名。您没有要求出现在公开日志中。这是我的流程和判断失误——不是您的。这个网站建立的初衷是透明记录工作，但透明从未意味着可以凌驾于您的隐私之上，或在未经许可的情况下暴露合作者。

这不会再发生。

English

1. Executive Summary

On or around April 24, 2026, your first name ("Nick") was inadvertently published on the public-facing diary page of juansworld.xyz. This document explains what happened, what was done to fix it, and what controls are now in place to ensure it never happens again.

2. Timeline

Date/Time	Event
2026-04-24	Day 8 diary entry ("Network and Fracture") was published live containing the sentence: "Collaborations with Nick."
2026-04-24	Discovery and immediate removal of your name from the public page.
2026-04-24	Full-site audit executed across all HTML, markdown, JavaScript, TypeScript, and JSON files. Confirmed: zero remaining references.
2026-04-24	Morning Brief section taken down as part of broader scope reduction.

2026-04-24	All cryptocurrency references removed from public-facing content.
2026-04-24	Complete git history wiped. The repository was reset to a single orphan commit with no prior history.

3. Remediation Actions Taken

a. Immediate Removal

Your name was stripped from the Day 8 diary entry within hours of discovery. The sentence was revised to: "Collaborations."

b. Comprehensive Audit

A project-wide grep search was executed across the entire codebase (67 files). Result: zero instances of "Nick" in any file, anywhere.

c. Content Scope Reduction

The Morning Brief section (macro news, geopolitics, market analysis) was removed from site navigation and deprecated. This reduces the attack surface for future leaks.

d. Regulatory Cleanup

All cryptocurrency, blockchain, and digital asset references were removed from public-facing pages and legal disclaimers. This ensures the site can operate in multi-jurisdiction environments without triggering financial regulation scrutiny.

e. History Destruction

The entire Git commit history was destroyed. The repository was rebuilt as a single orphan commit containing only the current file state. No prior commits, diffs, or logs remain recoverable from the public repository.

4. Root Cause Analysis

Factor	Description
Primary Cause	A diary entry containing a real person's name was committed and deployed without a second-pass review.
Contributing Factor	No "name-check" gate existed in the publishing workflow.

Contributing Factor	Diary entries were treated as personal logs rather than public documents subject to PII review.

5. Preventive Controls (Now Active)

Control	Implementation
Name Ban	Real names are banned from all public diary entries unless explicit written consent is obtained from the named party.
Two-Step Review	Any content referencing identifiable individuals must pass a second human review before deployment.
Quarterly PII Audits	Automated scanning for names, emails, phone numbers, and other identifiers on a 90-day cycle.
Multi-Jurisdiction Compliance	Crypto, gambling, investment, and regulated-topic references are barred from public content.
History Discipline	All future repositories will use squash-merge policies to minimize incidental data retention in commit history.

6. Apology

You did not consent to being named. You did not ask to appear in a public log. This was a failure of process and judgment on my part — not yours. The site was built to document work transparently, but transparency was never meant to override your privacy or expose collaborators without permission.

It will not happen again.
